

1. Record Nr.	UNINA9910138988603321
Titolo	Temperature and plant development // edited by Keara A. Franklin, Philip A. Wigge ; cover design by Matt Kuhns
Pubbl/distr/stampa	Ames, Iowa : , : Wiley-Blackwell, , 2014 ©2014
ISBN	1-118-30821-2 1-118-30824-7 1-118-30822-0
Descrizione fisica	1 online resource (250 p.)
Altri autori (Persone)	FranklinKeara A WiggePhilip A KuhnsMatt
Disciplina	581.3
Soggetti	Plants - Effect of temperature on Plants - Development
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Sommario/riassunto	Plants are incredibly sensitive to changes in temperature. Changes of a single degree or two in ambient temperature can impact plant architecture, developmental processes, immune response, and plant reproduction. Temperature and Plant Development thoroughly explores plant molecular responses to changes in temperature with aim to understanding how plants perceive, integrate, and respond to temperature signals. Temperature and Plant Development explores the diverse molecular responses that plants exhibit as they face changing temperatures. Temperature-related changes and adapta
