1. Record Nr. UNINA9910139028903321

Autore	Robert J Marks II
Titolo	Biological information-- new perspectives : proceedings of a symposium held May 31 through June 3, 2011 at Cornell University / / editors, Robert J. Marks II, Baylor University, USA, Michael J. Behe, Lehigh University, USA, William A. Dembski, Discovery Institute, USA, Bruce L. Gordon, Houston Baptist University, USA, John C. Sanford, Cornell University, USA
Pubbl/distr/stampa	World Scientific Publishing Co, 2013 New Jersey : , : World Scientific, , [2013] 2013
ISBN	981-4508-72-1
Descrizione fisica	1 online resource (xix, 563 pages) : illustrations (some color)
Collana	Gale eBooks
Disciplina	572.8/629 572.8629
Soggetti	Genomics Molecular genetics Cell interaction Mutation (Biology) Intelligent design (Teleology)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	section 1. Information theory & biology : introductory comments / Robert J. Marks II -- section 2. Biological information and genetic theory : introductory comments / John C. Sanford -- section 3. Theoretical molecular biology : introductory comments / Michael J. Behe -- section 4. Biological information and self-organizational complexity theory : introductory comments / Bruce L. Gordon.
Sommario/riassunto	In the spring of 2011, a diverse group of scientists gathered at Cornell University to discuss their research into the nature and origin of biological information. This symposium brought together experts in information theory, computer science, numerical simulation, thermodynamics, evolutionary theory, whole organism biology, developmental biology, molecular biology, genetics, physics,

biophysics, mathematics, and linguistics. This volume presents new research by those invited to speak at the conference.The contributors to this volume use their wide-ranging expertise in the area of biological
