Sommario/riassunto

An expert reveals a step-by-step process for profiting from neoclassical qualified trend trading. Trend Trading Set-Ups extends the neoclassical concept of qualified trend first introduced by Little in Trend Qualification and Trading, providing traders and investors with a sound methodology for uncovering the very best trade set-ups and the ability to time trade entries like never before. In Trend Trading Set-Ups, Little reveals the data behind qualified trends and utilizes a novel concept involving time to calculate trend failure probability rates.
