

1. Record Nr.	UNINA9910139090703321
Autore	Bindslev Niels
Titolo	Drug-Acceptor Interactions : Modeling Theoretical Tools to Test and Evaluate Experimental Equilibrium Effects
Pubbl/distr/stampa	Co-Action Publishing Boca Raton, FL : , : CRC Press, , 2017
ISBN	1-351-66057-8 1-315-15978-3 1-351-66058-6 91-977071-1-2
Edizione	[First edition.]
Descrizione fisica	1 online resource (798 pages) : illustrations
Disciplina	615.7045
Soggetti	Drug interactions Chemotherapy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references at the end of each chapters.
Sommario/riassunto	"Drug-Acceptor Interactions: Modeling theoretical tools to test and evaluate experimental equilibrium effects suggests novel theoretical tools to test and evaluate drug interactions seen with combinatorial drug therapy. The book provides an in-depth, yet controversial, exploration of existing tools for analysis of dose-response studies at equilibrium or steady state. The book is recommended reading for post-graduate students and researchers engaged in the study of systems biology, networks, and the pharmacodynamics of natural or industrial drugs, as well as for medical clinicians interested in drug application and combinatorial drug therapy. Even people without mathematical skills will be able to follow the pros and cons of reaction schemes and their related distribution equations. Chapter 9 is a hands-on guide for software to plot, fit and analyze one's own data."-- Provided by publisher.
