

1. Record Nr.	UNINA9910281060203321
Titolo	Ai confini del diritto : poteri, istituzioni e soggettività / a cura di Francesco Brancaccio e Chiara Giorgi
Pubbl/distr/stampa	Roma : DeriveApprodi, 2017
ISBN	978-88-6548-192-9
Descrizione fisica	159 p. ; 21 cm
Collana	DeriveApprodi
Disciplina	340
Locazione	FSPBC
Collocazione	II A 384
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia
2. Record Nr.	UNINA9910139203203321
Titolo	Broadband optical access networks : emerging technologies and optical-wireless convergence // L.G. Kazovsky ... [et al.]
Pubbl/distr/stampa	Hoboken, New Jersey : , : Wiley-Interscience, , c2011 [Piscataway, New Jersey] : , : IEEE Xplore, , [2011]
ISBN	1-283-02538-8 9786613025388 0-470-91093-3 0-470-91092-5
Descrizione fisica	1 online resource (301 p.)
Classificazione	TEC041000
Altri autori (Persone)	KazovskyLeonid G
Disciplina	621.382/7 621.3821 621.3827
Soggetti	Optical communications
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia

Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.

Sommario/riassunto

"Broadband optical access network is an ideal solution to alleviate the first/last mile bottleneck of current Internet infrastructures. Richly illustrated throughout to help clarify important topics, Broadband Optical Access Networks covers the architectures, protocols enabling technologies of broadband optical access networks, and all current and future competing technologies for access networks. This comprehensive work presents the evolution of optical access networks, including reach extension, bandwidth enhancement, and discusses the convergence of optical and wireless technologies for broadband access, making it an invaluable reference for researchers, electrical engineers, and graduate students"--

"This comprehensive reference covers the architectures, protocols enabling technologies of broadband optical access networks and all current and future competing technologies for access networks"--
