

1. Record Nr.	UNINA9910139207103321
Titolo	Illicit drugs in the environment [[electronic resource]] : occurrence, analysis, and fate using mass spectrometry / / edited by Sara Castiglioni, Ettore Zuccato, Roberto Fanelli
Pubbl/distr/stampa	Hoboken, N.J., : Wiley, c2011
ISBN	1-118-00899-5 1-280-74795-1 9786613677815 1-118-00081-1 1-118-00080-3
Descrizione fisica	1 online resource (367 p.)
Collana	Wiley Series on Mass Spectrometry ; ; v.40
Altri autori (Persone)	CastiglioniSara <1976-> ZuccatoEttore <1952-> FanelliRoberto <1944->
Disciplina	363.739/4
Soggetti	Drugs of abuse - Analysis Drugs of abuse - Environmental aspects Drugs of abuse - Spectra Water - Analysis Organic water pollutants Mass spectrometry
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	section 1. Introduction -- section 2. The physiology of illicit drugs -- section 3. Mass spectrometry in illicit drugs detection and measurement- current and novel environmental applications -- section 4. A. Mass spectrometric analysis of illicit drugs in the environment : occurrence and fate in wastewater and surface water -- section 4. B. Mass spectrometric analysis of illicit drugs in the environment : illicit drugs in drinking water -- section 4. C. Mass spectrometric analysis of illicit drugs in the environment : presence in air and suspended particulate matter -- section 5. Applications of illicit drug analysis in the environment -- section 6. Conclusions.

## Sommario/riassunto

Illicit drugs are an emerging class of environmental contaminants and mass spectrometry is the technique of choice for their analysis. This landmark reference discusses the analytical techniques used to detect illicit drugs in wastewater and surface water, details how to estimate the levels of contaminants in the environment, and explores the behavior, fate, and toxic effects of this new class of contaminants, now a ubiquitous presence in wastewater and surface water. The book details how an estimate of illicit drug consumption in a given population can be developed from an analysis of the

#### Sommario/riassunto

Research in Colonial and Postcolonial Linguistics has experienced a significant increase in contributions from varying fields of language studies, gaining the attention of scholars from all over the world. This volume aims to showcase the variety of topics relevant to the study of language(s) in colonial, postcolonial and decolonial contexts. A main reason of this variety is that the new paradigm invites and necessitates research on different subject matters such as language typology, grammar and cross-linguistics, meta-linguistics and research on language ideology, discourse analysis and pragmatics. The contributions of this volume are selected, peer-reviewed papers which were partly invited and partly given at the First Bremen Conference on Colonial and Postcolonial Linguistics, held in September 2013.
