

1. Record Nr.	UNINA9910671380403321
Autore	Torres Avila Jheison
Titolo	La transparencia y el buen gobierno : una perspectiva desde los derechos humanos y las obligaciones de los gobiernos locales // Jheison Torres Avila
Pubbl/distr/stampa	Bogota : , : Universidad Catolica de Colombia, , 2016
ISBN	958-8934-23-0
Descrizione fisica	1 online resource (128 paginas)
Collana	Coleccion JUS publico ; ; 11
Disciplina	352.88
Soggetti	Transparency in government - Colombia Freedom of information--Aspectos juridicos--Colombia Gobierno Derecho a la informacion Libros electronicos. Colombia
Lingua di pubblicazione	Spagnolo
Formato	Materiale a stampa
Livello bibliografico	Monografia
Nota di bibliografia	Contiene bibliografia.

2. Record Nr.	UNINA9910139243403321
Autore	Ghisellini Gabriele
Titolo	Radiative Processes in High Energy Astrophysics // by Gabriele Ghisellini
Pubbl/distr/stampa	Cham : , : Springer International Publishing : , : Imprint : Springer, , 2013
ISBN	3-319-00612-6
Edizione	[1st ed. 2013.]
Descrizione fisica	1 online resource (X, 147 p. 65 illus., 43 illus. in color.)
Collana	Lecture Notes in Physics, , 0075-8450 ; ; 873
Disciplina	523.01/9
Soggetti	Astrophysics Plasma (Ionized gases) Particle acceleration Optics Electrodynamics Astrophysics and Astroparticles Plasma Physics Particle Acceleration and Detection, Beam Physics Classical Electrodynamics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references (page 141) and index.
Nota di contenuto	Some Fundamental definitions -- Bremsstrahlung and Black Body -- Beaming -- Synchrotron Emission and Absorption -- Compton Scattering -- Synchrotron Self-Compton -- Pairs -- Active Galactic Nuclei -- References.
Sommario/riassunto	This book grew out of the author's notes from his course on Radiative Processes in High Energy Astrophysics. The course provides fundamental definitions of radiative processes and serves as a brief introduction to Bremsstrahlung and black body emission, relativistic beaming, synchrotron emission and absorption, Compton scattering, synchrotron self-compton emission, pair creation and emission. The final chapter discusses the observed features of Active Galactic Nuclei and their interpretation based on the radiative processes presented in the book. Written in an informal style, this book will guide students through their first encounter with high-energy astrophysics.
