

1. Record Nr.	UNINA9910139359703321
Titolo	Sedimentology of aqueous systems // edited by Cristiano Poleto and Susanne Charlesworth
Pubbl/distr/stampa	Hoboken, NJ, : Wiley, 2010
ISBN	9786612550997 9781282550995 1282550993 9781444317114 1444317113 9781444317121 1444317121
Descrizione fisica	1 online resource (215 p.)
Altri autori (Persone)	PoletoCristiano CharlesworthSusanne
Disciplina	551.3/53 551.353
Soggetti	Alluvium Sediment transport
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Sedimentology of Aqueous Systems; Contents; Contributors; Introduction: the sedimentology of aqueous systems; 1: Surrogate technologies for monitoring suspended-sediment transport in rivers; 2: Surrogate technologies for monitoring bed-load transport in rivers; 3: Sediment characterization; 4: Trace elements in urban environments: a review; 5: Urban aquatic sediments; 6: Biomarkers in integrated ecotoxicological sediment assessment; 7: Tools for assessing contaminated sediments in freshwater, estuarine, and marine ecosystems; Index
Sommario/riassunto	Sediments in aqueous systems are of increasing interest to academics, researchers, practitioners and stakeholders around the world. This book not only covers the characteristics of the sediments themselves, but also their physico-chemical impact on aquatic habitats and

subsequent management implications. There is a strong focus on methods and instrumentation for collecting data and monitoring of environmental sediment quality and as a result, a wide range of environments are considered - from urban areas to freshwater estuaries and marine ecosystems. The chapters have been written by internati
