| Sommario/riassunto      | Rangeland ecosystems which include unimproved grasslands, shrublands, savannas and semi-deserts, support half of the world's livestock, while also providing habitats for some of the most charismatic of wildlife species. This book examines the pressures on rangeland ecosystems worldwide from human land use, over-hunting, and subsistence and commercial farming of livestock and crops. Leading experts have pooled their experiences from all continents to cover the ecological, sociological, political, veterinary, and economic aspects of rangeland management today. This book provides practitioners |
