

1. Record Nr.	UNINA9910139499503321
Autore	Hirsch Lawrence J
Titolo	Atlas of EEG in critical care [[electronic resource] /] / Lawrence J. Hirsch, Richard P. Brenner
Pubbl/distr/stampa	Chichester, West Sussex ; ; Hoboken, NJ, : John Wiley, c2010
ISBN	1-282-68282-2 9786612682827 0-470-74670-X 0-470-74669-6
Edizione	[2nd ed.]
Descrizione fisica	1 online resource (348 p.)
Altri autori (Persone)	BrennerRichard P
Disciplina	616.8/047547 616.8047547
Soggetti	Electroencephalography Critical care medicine
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Atlas of EEG in Critical Care; Contents; Preface; List of contributors; 1 EEG basics; 2 EEG in encephalopathy; 3 Seizures and status epilepticus; 4 Periodic discharges and other controversial EEG patterns; 5 EEG in cerebrovascular disease; 6 Artifacts that can mimic seizures or other physiologic patterns; 7 Prolonged EEG monitoring and quantitative EEG techniques for detecting seizures and ischemia; 8 Evoked and event-related potentials in the ICU Appendix ACNS Standardized EEG Research Terminology and Categorization for the investigation of rhythmic and periodic patterns encountered in critically ill patients: March 2009 revisionIndex
Sommario/riassunto	As the population ages, technology improves, intensive care medicine expands and neurocritical care advances, the use of EEG monitoring in the critically ill is becoming increasingly important. This atlas is a comprehensive yet accessible introduction to the uses of EEG monitoring in the critical care setting. It includes basic EEG patterns seen in encephalopathy, both specific and non-specific, nonconvulsive seizures, periodic EEG patterns, and controversial patterns on the ictal-interictal continuum. Confusing artefacts, including ones that mimic

seizures, are shown and explained, and the
