Sommario/riassunto	Plagues in World History provides a concise, comparative world history of catastrophic infectious diseases, including plague, smallpox, tuberculosis, cholera, influenza, and AIDS. John Aberth considers not only their varied impact but also the many ways in which people have been able to influence diseases simply through their cultural attitudes. Our ability to alter disease, even without modern medical treatments, is even more crucial lesson now that AIDS, swine flu, multidrug-resistant tuberculosis, and other seemingly incurable illnesses have raged worldwide. The author's compara
