Sommario/riassunto

This volume contains 23 state-of-the-art papers presented at the
Dolomieu Conference on Carbonate Platforms and Dolomitization held
in September 1991 in Ortisei, Italy. The conference was co-sponsored
by the International Association of Sedimentologists (IAS) and the
Society for Sedimentary Geology (SEPM), and marked the 200th
anniversary of the 1791 paper by Deodat de Dolomieu describing
dolomite in detail for the first time. The papers presented do not aim to
give a complete review of the current state of the dolomitic art, but
rather discuss important advances and gaps in our knowledge of d
