## Sommario/riassunto

Structured bonds are often viewed as complex and opaque, and participants in the securitization and structured finance markets have traditionally had a narrow focus on a specific part of the securitization value chain. However, in the post credit crunch environment, the market is more regulated, standardized, transparent, and better structured with closer-aligned and more balanced incentives for all participants, more focus on investors and improved comprehension of these bond instruments. In order for the market to succeed, it is vital that all participants take a broader view and understand
