Sommario/riassunto	"What makes your company great today, however, won't necessarily make it great tomorrow. Evolving is critical to long-term corporate performance and health. Humankind's greatest invention isn't the wheel, it is organization: people working together towards a goal that is beyond what can be achieved by the sum of individuals acting alone. As each generation finds better and better ways of working together, we perform at levels that previous generations could never have imagined. On top of long term trends like cost-free availability of information and deriving differentiation by creating an experience, the world appears to be emerging from the most profound and far-reaching economic crisis since the great depression of the 1930's. And five other factors will continue to drive global change: the historic shift in economic growth from the developed to the developing world; an unprecedented imperative for mature economics to raise productivity to

preserve living standards; the rise of new networks of communication and trade; a profound challenge in balancing economic growth and environmental sustainability; and an expanded role for the state in regulating markets. For organizations to not only be excellent but stay excellent, companies need to respond to these challenges with tact and understanding that with the right techniques, change can be driven to a company's advantage. If you are a leader of people who wants to change things for the better, this book is for you. If you want to leave a profound and lasting legacy in your organization and the stakeholder it serves, this book will help you do so"--

Sommario/riassunto	Traquer « l'infra-ordinaire » là où règnent l'exceptionnel et le spectaculaire, questionner les évidences inscrites dans les modes d'emploi de l'existence commune, épuiser par écrit choses, espaces et lieux afin de constituer une archive à l'usage des générations présentes et à venir : tel fut l'un des principaux programmes de recherche de Georges Perec (1936-1982). Si cette « interrogation "sociologique" du quotidien » répond à un devoir de mémoire personnel, elle trouve toute sa place en France dans l'histoire longue d'une pensée du quotidien,

qui va de Braudel et Lefebvre à Blanchot et Certeau. En se mettant à l'écoute du bruit de fond sur lequel se détachent l'événement et l'Histoire, l'écrivain des Choses, d'Espèces d'espaces ou encore du projet inachevé « Lieux » fonde un mode de connaissance oblique qui, uni à une esthétique partagée entre le dépouillement et l'excès, reste exemplaire de notre difficile sortie de la modernité.

Sommario/riassunto	La fin du dix-neuvième siècle nous a appris une vérité douteuse : que la sexualité humaine est universelle. Depuis cette époque, nous nous sommes habitués à la singularité du plaisir, dans son principe toujours le même. Mais au dix-huitième siècle, on préférait parler de plaisirs au pluriel, et de l'art de les varier. Comment, dans les textes libertins et pornographiques, ce pluriel s'est-il transformé en singulier ? Cette transformation, historiquement, suppose une véritable crise.

Sommario/riassunto	Le langage algorithmique est d'une richesse expressive suffisante pour faire face à la haute complexité descriptive du monde vivant. Les circuits cellulaires, les bancs de poissons, les nuées d'oiseaux, la transmission de rumeurs, les mouvements de foule, la polarisation politique sont autant d'exemples de dynamique sociale qui se prêtent à la modélisation par les algorithmes naturels. L'algorithmique est essentielle à la science du XXIe siècle et constitue un des grands enjeux de l'informatique d'aujourd'hui.

Sommario/riassunto

The levels of toxic and microbial contamination in the food and environment are influenced by harvesting or slaughtering technologies and by the processes applied during food manufacture. With current cultivation methods, it is impossible to guarantee the absence of pesticides and pathogenic microorganisms in raw foods, both of plant and animal origin. Widespread and increasing incidence of foodborne diseases and the resulting social and economic impact on the world population have brought food and environmental safety to the forefront of ecological safety and public health concerns. The emer
