

1. Record Nr.	UNINA9910139697603321
Autore	Marcus Y
Titolo	Supercritical water [[electronic resource] ] : a green solvent : properties and uses // Yizhak Marcus
Pubbl/distr/stampa	Hoboken, N.J., : Wiley, c2012
ISBN	1-280-67881-X 9786613655745 1-118-31027-6 1-118-31025-X 1-118-31022-5
Edizione	[2nd ed.]
Descrizione fisica	1 online resource (220 p.)
Classificazione	SCI013050
Disciplina	541/.3482
Soggetti	Solvents Green technology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes indexes.
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	Machine generated contents note: PrefaceList of symbols1. Introduction1.1 Phase diagrams of single fluids1.2 The critical point1.3 Supercritical fluids as solvents1.4 Gaseous and liquid water1.5 Near-critical water1.6 Summary2. Bulk properties of SCW2.1 Equations of state2.2 Thermophysical properties2.3 Electrical and Optical Properties2.4 Transport Properties2.5 Ionic Dissociation of SCW2.6 Properties related to the solvent power of SCW2.7 Summary3. Molecular properties3.1 Structure of SCW obtained by diffraction3.2 Computer simulations of SCW3.3 Spectroscopic studies of SCW3.4 Extent of hydrogen bonding3.5 The dynamics of water molecules in SCW3.5 Summary4. SCW as a 'green' solvent4.1 Solutions of gases in SCW4.2 Solutions of organic substances in SCW4.3 Solutions of Salts and ions in SCW4.4 Binary mixtures of co-solvents with SCW4.5 Summary5. Applications of SCW5.1 Conversion of organic material to fuel5.2 SCWO: Total oxidation of obnoxious and hazardous materials5.3 Uses of SCW in organic synthesis5.4 Uses in powder technology of inorganic substances5.5 Geothermal aspects of SCW5.6 Application of SCW in nuclear reactors5.7 Corrosion problems with SCW5.8 Summary6.

---

Sommario/riassunto

"This is the only book on the market that covers the issue of supercritical water in such a comprehensive way. The book begins with an introduction that defines supercritical fluids in general and supercritical water in particular and relates it to water along the saturation curve"--
