Sommario/riassunto	Medicines are the most common form of treatment for those with mental health problems worldwide. Medicines Management in Mental

Health Care is the first detailed evidence-based medicines management text for mental health practitioners in the UK. Medicines Management in Mental Health Care is divided into two parts. Part one provides mental health nurses and other mental health workers with a detailed understanding of the evidence-base for medicines management covering subjects including psychotropic medication and co-morbidity. Part two addresses the practical implications
