| 1. Record Nr. | UNINA9910139875403321 |
| Titolo | Staphylococci in human disease [[electronic resource] /] / edited by Kent B. Crossley ... [et al.] |
| Pubbl/distr/stampa | Chichester, West Sussex ; ; Hoboken, NJ, : Wiley-Blackwell, 2009 |
| ISBN | 1-282-33160-4 9786612331602 1-4443-0846-7 1-4443-0847-5 |
| Edizione | [2nd ed.] |
| Descrizione fisica | 1 online resource (647 p.) |
| Altri autori (Persone) | CrossleyKent B |
| Disciplina | 616.9297 |
| Soggetti | Staphylococcal infections Gram-positive bacterial infections |
| Lingua di pubblicazione | Inglese |
| Formato | Materiale a stampa |
| Livello bibliografico | Monografia |
| Note generali | Description based upon print version of record. |
| Nota di bibliografia | Includes bibliographical references and index. |
| Nota di contenuto | Staphylococci inHuman Disease; Contents; Contributors; Preface to the Second Edition; Section IThe Organisms; Biology and Taxonomy; Chapter 1The Biology of Staphylococci; Chapter 2Genomics of the Staphylococci; Chapter 3Evolution and Taxonomyof Staphylococci; Chapter 4Molecular Basis of Pathogenicity; Chapter 5Adaptation to Stress: Biofilms andSmall-colony Variants; Chapter 6Exotoxins; Chapter 7Host Defense Against StaphylococcalInfection; Antimicrobial Resistance inStaphylococci; Chapter 8Resistance to b -Lactam Antibiotics; Chapter 9Resistance to Glycopeptides Chapter 10Resistance to Other AgentsLaboratory Studies; Chapter 11Issues in the Identification andSusceptibility Testing of Staphylococci; Section IIEpidemiology of StaphylococcalInfection; Chapter 12Colonization with Staphylococcus aureus and the Role of Colonizationin Causing Infection; Chapter 13Epidemiology of Community-associatedStaphylococcus aureus Infections; Chapter 14Epidemiology of Healthcare-associatedStaphylococcus aureus Infections; Chapter 15Epidemiology of Coagulase-negativeStaphylococci and Infections Causedby these Organisms; Section IIIDiseases Caused by Staphylococci |

Chapter 16 Staphylococcus aureus Bacteremia and Endocarditis
Chapter 17 Surgical-site Infections and Surgical Prophylaxis;
Chapter 18 Infections of Intravascular Catheters and Vascular Devices;
Chapter 19 Skin and Soft Tissue Infections;
Chapter 20 Central Nervous System Infections;
Chapter 21 Diseases of the Eye;
Chapter 22 Osteomyelitis and Other Bone and Joint Infections;
Chapter 23 Staphylococcal Pneumonia;
Chapter 24 Urinary Tract Infections;
Chapter 25 Toxic Shock Syndrome;
Chapter 26 Toxin-mediated Syndromes;
Chapter 27 Staphylococcal Diarrhea and Enterocolitis
Chapter 28 Infections in Immunocompromised Patients
Chapter 29 Clinical Manifestations of Community-acquired MRSA Infections;
Section IV Prevention and Treatment of Staphylococcal Infections;
Chapter 30 Elimination of Staphylococcus aureus Carriage: Importance and Strategies;
Chapter 31 Treatment of Staphylococcal Infection;
Chapter 32 Vaccine-based Strategies for Prevention of Staphylococcus aureus Infection;
Index; Plates

Sommario/riassunto

Staphylococci remain the most important cause of hospital-acquired infections in the U.S. and MRSA has become the most common cause of skin and soft tissue infection in many parts of the world. There is now a much greater understanding of the physiology and evolution of the staphylococci and this new edition reflects the rapid advancements in knowledge about this pathogen and provides a comprehensive review from both clinical and basic science perspectives. The first section addresses the basic biology of the staphylococci, their molecular genetics, host defenses and host evasion, virulence
