

1. Record Nr.	UNINA9910140310003321
Autore	Lin Jianyi
Titolo	Exact algorithms for size constrained clustering // Jianyi Lin
Pubbl/distr/stampa	Ledizioni, 2013 Milan : , : Libreria Ledi Srl, , 2013
Collana	Mathematical Sciences
Soggetti	Algorithms Mathematics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	Clustering or cluster analysis [5] is a method in unsupervised learning and one of the most used techniques in statistical data analysis. Clustering has a wide range of applications in many areas like pattern recognition, medical diagnostics, datamining, biology, market research and image analysis among others. A cluster is a set of data points that in some sense are similar to each other, and clustering is a process of partitioning a data set into disjoint clusters. In distance clustering, the similarity among data points is obtained by means of a distance function.
