Sommario/riassunto	Anything is possible in installation art. The typically short lifespan of the materials and techniques used and the intended experience can be endless, often to the despair of the custodian of the work. The processes involved in preserving this complex form of art, reinstalling it, finding ways to recreate the experience over and again, as well as the decisionmaking that underlies these processes, form the backbone of this book. What did the artist originally intend and how has that concept been realised in the past? How can one preserve and document the installation? What relation exists between the components and the space, and what is the spectator's part in the work? Questions of this kind are examined in connection with a number of case studies. At the same time, it reports on the results of an extensive research project Inside Installations (2004-2007) carried out by an international group of custodians active in the conservation of contemporary art.

Sommario/riassunto	Some of the most important and best lessons in a doctor's career are learnt from mistakes. However, an awareness of the common causes of medical errors and developing positive behaviours can reduce the risk of mistakes and litigation. Written for junior medical staff and consultants, and unlike any other clinical management title available, Avoiding Errors in Adult Medicine identifies and explains the most common errors likely to occur in an adult medicine setting - so that you won't make them. The first section in this brand new guide discusses the causes of
