Sommario/riassunto	Preternatural is an exhibition catalogue published on the occasion of the exhibition "Preternatural," 9 December 2011 to 17 February 2012, Ottawa, Canada ( <a href="http://www.preternatural.ca">http://www.preternatural.ca</a> ). The exhibition comprises three installation sites and 9 artists, all of whom explore the idea that art itself is a form of preternatural pursuit, in which they explore the bewildering condition of being in between the mundane and the marvelous in nature. It questions a world that understands itself as accessible, reachable, and 'knowable' and counters it with a consideration of this heterogenous proposition.
