| Sommario/riassunto | Forgotten People deals with people living at the fringes of the Indonesian society. It describes and analyses their livelihoods and styles of making a living from an insider perspective. While Indonesia has experienced steady economic growth for more than a decade, the livelihoods and lifestyles of poor people and migrants confronted with poverty and insecurity have received less attention. This book describes and analyses diversity in livelihood strategies, risk-taking and local forms of social security (social welfare) of people living below or close |

to the Indonesian poverty line. It puts two categories of forgotten people at the centre. Peasants, living in remote areas in rural Java, and Madurese migrants craving for a better life in urban and rural East Kalimantan. A full text Open Access version is also available.
