

1. Record Nr.	UNINA9910140506403321
Titolo	Klimawandel in Österreich : die letzten 20.000 Jahre-- und ein Blick voraus / / Roland Schmidt, Christoph Matulla, Roland Psenner (Hrsg.)
Pubbl/distr/stampa	Innsbruck : , : Innsbruck University Press, , 2009 ©2009
ISBN	9783902571892 (ebook) 3902571896 (ebook)
Descrizione fisica	1 online resource (183 pages) : illustrations; digital, PDF file(s)
Collana	Alpine space, man & environment ; ; volume 6
Disciplina	551.69436
Soggetti	Climatic changes - Austria Earth & Environmental Sciences Meteorology & Climatology
Lingua di pubblicazione	Tedesco
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographic references.
Sommario/riassunto	The changes in climate affected especially the Alps during the past 20,000 years. In this book more than 20 experts from different fields present the current state of climate research in Austria, starting from the last ice age until the current climate warming. In the early Holocene human activities were driven by the climate while in modern societies climate change is driven to an increasing amount by human activities. Undoubtedly the Alps were much more affected by climate change than many other regions of the world, but still the authors dare to look ahead into the future.
