1.	Record Nr.	UNINA9910140506903321
	Autore	Torres-Moreno Juan-Manuel
	Titolo	Automatic text summarization / / Juan-Manuel, Torres-Moreno
	Pubbl/distr/stampa	London, [England] ; ; Hoboken, New Jersey : , : ISTE Limited : , : John Wiley & Sons, , 2014 ©2014
	ISBN	1-119-04407-3 1-119-00475-6 1-119-04414-6
	Descrizione fisica	1 online resource (376 p.)
	Disciplina	025.04
	Soggetti	Automatic abstracting
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Description based upon print version of record.
	Nota di bibliografia	Includes bibliographical references and index.
	Nota di contenuto	Cover Page; Half-title Page; Title page; Copyright page; Contents; Foreword by A. Zamora and R. Salvador; Foreword; The need to identify important information; The problem of information storage; Automatic size reduction; The future; Foreword by H. Saggion; Automatic Text Summarization; Juan-Manual Torres-Moreno; Notation; Introduction; The need to summarize texts; The summarization process; Automatic text summarization; About this book; PART 1: Foundations; 1: Why Summarize Texts?; 1.1. The need for automatic summarization; 1.2. Definitions of text summarization 1.3. Categorizing automatic summaries1.4. Applications of automatic text summarization; 1.5. About automatic text summarization; 1.6. Conclusion; 2: Automatic Text Summarization: Some Important Concepts; 2.1. Processes before the process; 2.1.1. Sentence-term matrix: the vector space model (VSM) model; 2.2. Extraction, abstraction or compression?; 2.3. Extraction-based summarization; 2.3.1. Surface-level algorithms; 2.3.2. Intermediate-level algorithms; 2.3.3. Deep parsing algorithms; 2.4. Abstract summarization; 2.4.1. FRUMP or the temptation to understand 2.4.2. Information extraction and abstract generation2.5. Sentence compression and fusion; 2.5.1. Sentence compression; 2.5.2. Multisentence fusion; 2.6. The limits of extraction; 2.6.1. Cohesion and

| Sommario/riassunto | This new textbook examines the motivations and the different algorithms for automatic document summarization (ADS). We performed a recent state of the art. The book shows the main problems of ADS, difficulties and the solutions provided by the community. It presents recent advances in ADS, as well as current applications and trends. The approaches are statistical, linguistic and symbolic. Several exemples are included in order to clarify the theoretical concepts. The books currently available in the area of Automatic Document Summarization are not recent. Powerful algorithms have been develop |
