

1. Record Nr.	UNINA9910456781903321
Autore	Sloan Doris
Titolo	Geology of the San Francisco Bay region [[electronic resource] /] / Doris Sloan ; with photographs by John Karachewski
Pubbl/distr/stampa	Berkeley, : University of California Press, 2006
ISBN	1-282-35784-0 9786612357848 0-520-93781-3
Descrizione fisica	1 online resource (353 p.)
Collana	California natural history guides ; ; 79
Disciplina	557.94/61
Soggetti	Geology - California - San Francisco Bay Area Electronic books.
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	Frontmatter -- CONTENTS -- ACKNOWLEDGMENTS -- INTRODUCTION -- 1. THE BAY AREA AND THE PROCESSES THAT SHAPE ITS GEOLOGY -- 2. THE PLATE TECTONIC FRAMEWORK -- 3. THE REMARKABLE ROCKS OF THE BAY AREA -- 4. MARIN COUNTY: A DIVIDED LANDSCAPE -- 5. SAN FRANCISCO: GEOLOGY BENEATH THE PAVEMENT -- 6. THE BAY AND THE ISLANDS -- 7. THE PENINSULA: COAST, REDWOODS, AND BAY -- 8. THE SOUTH BAY -- 9. THE EAST BAY -- 10. THE NORTH BAY -- GLOSSARY -- FURTHER READING -- FIGURE AND MAP SOURCES -- PHOTO CREDITS -- ADDITIONAL CAPTIONS -- GEOLOGIC MAPS INDEX -- INDEX
Sommario/riassunto	Why does a bit of ocean floor lie on top of Mt. Diablo? Why is Red Rock, that small, knobby island in San Francisco Bay, red? Why is Loma Prieta high? This book is for San Francisco Bay Area residents and visitors who want to explore the geologic world of this spectacular area, to learn about its shapes, colors, and rocky foundations. Doris Sloan illuminates the colorful geologic mosaic that surrounds San Francisco Bay and lucidly explains the complex and fascinating processes that have forged it over millions of years. In a lively and engaging style, Sloan describes forces such as the movement of tectonic plates, erosion, the waves on the coast, and human activity. She provides background

information on the processes, time frame, and rocks that are the key to understanding the Bay Area landscape and geologic history, then turns to distinct regions of the Bay Area and to San Francisco Bay itself. * Superbly illustrated with 139 color photographs, 41 drawings, and 29 maps * Covers Alameda, Contra Costa, Marin, Napa, San Francisco, San Mateo, Santa Clara, Solano, and Sonoma counties * Gives clear, nontechnical explanations of complex topics including plate tectonics and the Bay Area's fault systems * Suggests locales in parks and open space preserves to view Bay Area geology in action

2. Record Nr.	UNINA9910464058303321
Autore	Gregory Steven <1954->
Titolo	The devil behind the mirror : globalization and politics in the Dominican Republic // Steven Gregory ; with a new preface
Pubbl/distr/stampa	Berkeley : , : University of California Press, , [2014] ©2014
ISBN	0-520-95789-X
Descrizione fisica	1 online resource (311 p.)
Disciplina	330.97293
Soggetti	Globalization - Dominican Republic Globalization - Political aspects - Dominican Republic Tourism - Dominican Republic Electronic books. Dominican Republic Foreign economic relations Dominican Republic Economic conditions 1961- Dominican Republic Social conditions 1961-
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	The politics of livelihood -- The spatial economy of difference -- Structures of the imagination -- Sex, tourism and the political economy of masculinity -- Race, identity, and the body politic -- The politics of transnational capital.
Sommario/riassunto	In The Devil behind the Mirror, Steven Gregory provides a compelling

and intimate account of the impact that transnational processes associated with globalization are having on the lives and livelihoods of people in the Dominican Republic. Grounded in ethnographic fieldwork conducted in the adjacent towns of Boca Chica and Andrés, Gregory's study deftly demonstrates how transnational flows of capital, culture, and people are mediated by contextually specific power relations, politics, and history. He explores such topics as the informal economy, the making of a telenova, sex tourism, and racism and discrimination against Haitians, who occupy the lowest rung on the Dominican economic ladder. Innovative, beautifully written, and now updated with a new preface, *The Devil behind the Mirror* masterfully situates the analysis of global economic change in everyday lives.

3. Record Nr.	UNINA9910140558503321
Autore	Fink Johannes Karl
Titolo	Handbook of engineering and specialty thermoplastics . Volume 1 Polyolefins and styrenics // Johannes Karl Fink
Pubbl/distr/stampa	Hoboken : , : Wiley, , [2010] ©2010
ISBN	1-118-02928-3 1-282-65407-1 9786612654077 1-61344-194-0 0-470-88171-2 0-470-88185-2
Edizione	[1st ed.]
Descrizione fisica	1 online resource (401 p.)
Collana	Wiley-Scrivener ; ; v.7
Disciplina	668.423 668.4234
Soggetti	Polyolefins Polystyrene Thermoplastics
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.

Nota di contenuto

Handbook of Engineering and Speciality Thermoplastics; Preface; Contents; 1 Metathesis Polymers; 2 Cyclic Olefin Copolymers; 3 Ultra High Molecular Weight Poly(ethylene); 4 Poly(methyl)pentene; 5 Ionomers; 6 Poly(isobutylene); 7 Ethylene Vinyl Acetate Copolymers; 8 Acrylonitrile-Butadiene-Styrene Polymers; 9 High Impact Poly(styrene); 10 Styrene/Acrylonitrile Polymers; 11 Methyl methacrylate/Butadiene/Styrene Polymers; 12 Acrylonitrile/Styrene/Acrylate Polymers; Index

Sommario/riassunto

Utilizes an encyclopedic approach to cover the developments in polyolefins and styrenics during the last decade This book focuses on common types of polymers belonging to the class of polyolefins and styrenics. The text is arranged according to the chemical constitution of polymers and reviews the developments that have taken place in the last decade. A brief introduction to the polymer type is given and previous monographs and reviews dealing with the topic are listed for quick reference. The text continues with monomers, polymerization, fabrication techniques, properties, applicatio
