

1. Record Nr.	UNINA9910140573503321
Titolo	Supercentenarians // Heiner Maier ... [et al.] editors
Pubbl/distr/stampa	New York, : Springer, 2010
ISBN	1-282-83937-3 9786612839375 3-642-11520-9
Edizione	[1st ed. 2010.]
Descrizione fisica	1 online resource (330 p.)
Collana	Demographic research monographs, , 1613-5520
Altri autori (Persone)	MaierHeiner
Disciplina	304.64
Soggetti	Centenarians Longevity
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references.
Nota di contenuto	pt. 1. General -- pt. 2. Country reports -- pt. 3. Research on supercentenarians.
Sommario/riassunto	Does human mortality after age 110 continue to rise, level off, or start to decline? This book describes a concerted, international research effort undertaken with the goal of establishing a database that allows the best possible description of the mortality trajectory beyond the age of 110. The International Database on Longevity (IDL) is the result of this ongoing effort. The IDL contains exhaustive information on validated cases of supercentenarians (people 110 years and older) and allows unbiased estimates of mortality after age 110. The main finding is remarkable: human mortality after age 110 is flat at a probability of death of 50% per year. The sixteen chapters of this book discuss age validation of exceptional longevity, data on supercentenarians in a series of countries, structure and contents of the IDL, and statistical analysis of human mortality after age 110. Several chapters include short accounts of specific supercentenarians that add life to demographic research.
