Sommario/riassunto

Based on in-depth research in Poland and Slovakia, Domesticating
Neo-Liberalism addresses how we understand the processes of neo-
liberalization in post-socialist cities. Builds upon a vast amount of new
research data
Examines how households try to sustain their livelihoods
at particularly dramatic and difficult times of urban
transformation
Provides a major contribution to how we theorize the
geographies of neo-liberalism
Offers a conclusion which informs
discussions of social policy within European Union enlargement
