Pressure of migration on social protection systems in the enlarged EU / Nowaczek, Krzysztof -- 15 The EU Directive on Free Movement: A challenge for the European welfare state? / Ochel, Wolfgang -- Notes on contributors

Sommario/riassunto

A Continent Moving West? argues that the conceptualization of migration as a one-way or long-term process is becoming increasingly wide of the mark. Rather, east-west labor migration in Europe, in common perhaps with other flows in and from other parts of the world, is diverse, fluid, and influenced by the dynamics of local and sector-specific labor markets and migration-related political regulations. The papers in this book contribute to critical understanding of the east-west migration within the European Union after the 2004 enlargement, from the new to the old member states.
