## Epidemiology Studies

7 Genetic Epidemiology, Physical Activity, and Inactivity  
8 Role of Genetics Factors in Sport Performance: Evidence from Family Studies; 9 Twin Studies in Sport Performance; 10 Twin and Family Studies of Training Responses; 11 Ethnic Differences in Sport Performance; 12 Selection Experiments in Rodents to Define the Complexity and Diversity of Endurance Capacity; Part 3 Contributions of Specific Genes and Markers; 13 Genes and Endurance Performance; 14 Genes and Strength and Power Phenotypes; 15 Genes and Response to Training  
16 Genetic Determinants of Exercise Performance: Evidence from Transgenic and Null Mouse Models  
17 The ACE Gene and Performance;  
18 The ACTN3 Gene and Human Performance; 19 Mitochondrial DNA Sequence Variation and Performance; 20 Genes, Exercise, and Lipid Metabolism; 21 Genes, Exercise, and Glucose and Insulin Metabolism; 22 Genes, Exercise, and Cardiovascular Phenotypes; 23 Genes, Exercise, and Protein Metabolism; 24 The Regulation of Physical Activity by Genetic Mechanisms: Is There a Drive to Be Active?; 25 Genes, Exercise, and Psychological Factors  
Part 4 Systems Biology of Exercise and Training  
26 A Primer on Systems Biology, as Applied to Exercise Physiology and Metabolism; 27 Systems Biology Through Time Series Data-A Strength of Muscle Remodeling; 28 Proteomics in Exercise Training Research; 29 The Influence of Physical Exercise on Adult Stem Cells; Part 5 Ethical and Societal Implications; 30 Genetics and Ethics in Elite Sport; 31 Genes and Talent Selection; 32 Performance Enhancement by Gene Doping; 33 Bioethical Concerns in a Culture of Human Enhancement; Index; A; B; C; D; E; F; G; H; I; J; K; L; M; N; O; P; Q; R; S; T; U; V; W

### Sommario/riassunto

This is the latest volume in the IOC Encyclopaedia of Sports Medicine series, summarizing the evidence from all relevant sources on the genetic and molecular basis of sports and other human physical performance. The initial chapters address the basic science of genomics and genetics and the regulation of gene expression. Additional chapters provide authoritative information on the genetics of complex performance phenotypes, the contributions of small animal research, family and twin studies, and ethnic comparisons. A final section addresses the issue of the contribution of specific

| Sommario/riassunto      | Bei der nationalsozialistischen Mordpolitik gegen die Juden kam es in allen Teilen des besetzten Europas zur unheilvollen Verknüpfung von Kollaboration und Völkermord. Auch ohne fremde Hilfe hätte die Shoah singuläre Dimensionen angenommen, doch erhöhten die Zuarbeit und Mithilfe einheimischer Bürokraten, Polizisten und antisemitischer Aktivisten die Effizienz der deutschen Täter. Nicht immer ging die  |

Initiative vor Ort allein von den Deutschen aus. Die Kenntnis über diesen gewichtigen Aspekt der Holocaustgeschichte ist noch fragmentarisch, wird in jüngster Zeit aber durch neue Forschungen erheblich erweitert. Dieser Band führt exemplarische Länderstudien zusammen und richtet den Blick gleichermaßen auf den Westen wie den Osten Europas. Wassili Grossmans Reportage "Ukraine ohne Juden" aus dem Jahr 1943 ergänzt die Untersuchungen um ein eindrucksvolles Zeitzeugnis.
