Sommario/riassunto	In the last 50 years, the United Kingdom has witnessed a growing proportion of mixed African-Caribbean and white British families. With rich new primary evidence of 'mixed-race' in the capital city, The Creolisation of London Kinship thoughtfully explores this population. Making an indelible contribution to both kinship research and wider social debates, the book emphasizes a long-term evolution of family relationships across generations. Individuals are followed through changing social and historical contexts, seeking to understand in how

far many of these transformations may be interpreted
