Sommario/riassunto	Extraordinary advances in the understanding of the links between nutrition, metabolism, and cardiovascular disease have prompted a systematic reappraisal of knowledge in the field. As a result, it is now imperative that clinicians who care for patients with CVD or its key risk factors have a solid understanding of the often complex interrelationships between cardiovascular health and chronic diseases such as diabetes and obesity. Written by a team of international thought leaders in cardiology, endocrinology, diabetology and nutritional science, this important new book:
