

1.	Record Nr.	UNIORUON00016666
	Autore	CHUNG-MIN LEE, Ph. D.
	Titolo	Abstract syntax and Korean with reference to English / Chung-min Lee
	Pubbl/distr/stampa	Seoul, : Pan Korea Book Corporation, 1973 188 p. ; 26 cm
	Classificazione	COR II C
	Soggetti	Lingua coreana - Grammatiche
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
2.	Record Nr.	UNINA9910845096003321
	Autore	Walia Abhishek
	Titolo	Advancements in Microbial Biotechnology for Soil Health / / edited by Ravi Kant Bhatia, Abhishek Walia
	Pubbl/distr/stampa	Singapore : , : Springer Nature Singapore : , : Imprint : Springer, , 2024
	ISBN	981-9994-82-9
	Edizione	[1st ed. 2024.]
	Descrizione fisica	1 online resource (367 pages)
	Collana	Microorganisms for Sustainability, , 2512-1898 ; ; 50
	Disciplina	579.17
	Soggetti	Microbial ecology Microbial populations Microbial genetics Environmental Microbiology Microbial Communities Microbial Genetics
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Nota di contenuto	1. Soil microbiome as a key factor in soil health -- 2. Tools and techniques to measure soil-health -- 3. Bioengineered microbes for restoration of soil health -- 4. Microbial Inoculum Improvement for Soil

Health -- 5. Microbial Metabolites and their Role to Improve Soil Health -- 6. Microbial enzymes for soil health -- 7. Microbial Bio-fertilizers For Soil Health -- 8. Bio-Control Agents For Soil Health Management -- 9. Nutrient Recycling by Microbes for Healthy Soil -- 10. Plant-Microbe Interaction to Improve Soil Health -- 11. Impact of Anthropogenic Activities on Microbial Diversity and Soil Health -- 12. Organic and Natural Farming to Boost Soil Immunity -- 13. Detoxification of contaminated soil to restore its health for sustainable agriculture -- 14. Nano-biotechnology and its Applications in Maintaining Soil Health -- 15. Advanced and emerging techniques in soil health management.

Sommario/riassunto

This edited book covers the latest trends to improve soil health. It provides an easy-to-understand information to the readers. This book acts as a reference book for various agronomists and research scholars working in the field of agriculture. This edited book covers advanced technologies and practices carried out worldwide to improve soil health. In the present scenario, it is very important to save soil health and replenish it in a sustainable manner from various anthropogenic hazards. As soil is the source to almost all lives on earth and it is duty, the scientific community is developing ways to disseminate and communicate the most recent advancements to restore its health. Content of the book is designed in such a way that it provides a compressive information to the readers to restore the soil health that will ultimately help to improve the health of microbes, animals as well as plants that thrive in the soil and ultimately the quality of life of human being. This book helps research scholars and teachers working in agriculture, horticulture, and environmental management by utilizing advances in microbiology and biotechnology. It is of interest to undergraduate and graduate students, teachers, researchers, environmentalists, agriculture and horticulture scientists, capacity builders, policy makers and all other stakeholders. .

3. Record Nr.	UNINA9910141054603321
Titolo	Latin american journal of economics
Pubbl/distr/stampa	[Santiago, Chile], : Instituto de Economía, Pontificia Universidad Católica de Chile
