

1. Record Nr.	UNINA9910141256403321
Autore	Santi Paolo
Titolo	Mobility models for next generation wireless networks : ad hoc, vehicular, and mesh networks // Paolo Santi
Pubbl/distr/stampa	Hoboken, New Jersey : , : Wiley, , 2012 [Piscataway, New Jersey] : , : IEEE Xplore, , [2012]
ISBN	1-280-69673-7 9786613673695 1-118-34476-6 1-118-34477-4 1-118-34491-X
Descrizione fisica	1 online resource (376 p.)
Collana	Wiley series on communications networking & distributed systems
Disciplina	004.6
Soggetti	Wireless communication systems
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	List of Figures xv -- List of Tables xxiii -- About the Author xxv -- Preface xxvii -- Acknowledgments xxxiii -- List of Abbreviations xxxv -- Part I INTRODUCTION -- 1 Next Generation Wireless Networks 3 -- 1.1 WLAN and Mesh Networks 5 -- 1.2 Ad Hoc Networks 8 -- 1.3 Vehicular Networks 10 -- 1.4 Wireless Sensor Networks 13 -- 1.5 Opportunistic Networks 14 -- 2 Modeling Next Generation Wireless Networks 19 -- 2.1 Radio Channel Models 20 -- 2.2 The Communication Graph 26 -- 2.3 The Energy Model 31 -- 3 Mobility Models for Next Generation Wireless Networks 33 -- 3.1 Motivation 33 -- 3.2 Cellular vs. Next Generation Wireless Network Mobility Models 35 -- 3.3 A Taxonomy of Existing Mobility Models 38 -- 3.4 Mobility Models and Real-World Traces: The CRAWDAD Resource 43 -- 3.5 Basic Definitions 45 -- Part II "GENERAL-PURPOSE" MOBILITY MODELS -- 4 Random Walk Models 51 -- 4.1 Discrete Random Walks 52 -- 4.2 Continuous Random Walks 55 -- 4.3 Other Random Walk Models 57 -- 4.4 Theoretical Properties of Random Walk Models 58 -- 5 The Random Waypoint Model 61 -- 5.1 The RWP Model 62 -- 5.2 The Node Spatial Distribution of the RWP Model 64 -- 5.3 The Average Nodal Speed of

the RWP Model 69 -- 5.4 Variants of the RWP Model 73 -- 6 Group Mobility and Other Synthetic Mobility Models 75 -- 6.1 The RPGM Model 76 -- 6.2 Other Synthetic Mobility Models 83 -- 7 Random Trip Models 89 -- 7.1 The Class of Random Trip Models 89 -- 7.2 Stationarity of Random Trip Models 93 -- 7.3 Examples of Random Trip Models 94 -- Part III MOBILITY MODELS FOR WLAN AND MESH NETWORKS -- 8 WLAN and Mesh Networks 101 -- 8.1 WLAN and Mesh Networks: State of the Art 101 -- 8.2 WLAN and Mesh Networks: User Scenarios 107 -- 8.3 WLAN and Mesh Networks: Perspectives 109 -- 8.4 Further Reading 111 -- 9 Real-World WLAN Mobility 113 -- 9.1 Real-World WLAN Traces 113 -- 9.2 Features of WLAN Mobility 116 -- 10 WLAN Mobility Models 121 -- 10.1 The LH Mobility Model 122 -- 10.2 The KKK Mobility Model 129 -- 10.3 Final Considerations and Further Reading 137.

Part IV MOBILITY MODELS FOR VEHICULAR NETWORKS -- 11 Vehicular Networks 141 -- 11.1 Vehicular Networks: State of the Art 141 -- 11.2 Vehicular Networks: User Scenarios 146 -- 11.3 Vehicular Networks: Perspectives 150 -- 11.4 Further Reading 151 -- 12 Vehicular Networks: Macroscopic and Microscopic Mobility Models 153 -- 12.1 Vehicular Mobility Models: The Macroscopic View 154 -- 12.2 Vehicular Mobility Models: The Microscopic View 156 -- 12.3 Further Reading 157 -- 13 Microscopic Vehicular Mobility Models 159 -- 13.1 Simple Microscopic Mobility Models 159 -- 13.2 The SUMO Mobility Model 164 -- 13.3 Integrating Vehicular Mobility and Wireless Network Simulation 168 -- Part V MOBILITY MODELS FOR WIRELESS SENSOR NETWORKS -- 14 Wireless Sensor Networks 175 -- 14.1 Wireless Sensor Networks: State of the Art 175 -- 14.2 Wireless Sensor Networks: User Scenarios 180 -- 14.3 WSNs: Perspectives 183 -- 14.4 Further Reading 184 -- 15 Wireless Sensor Networks: Passive Mobility Models 185 -- 15.1 Passive Mobility in WSNs 186 -- 15.2 Mobility Models for Wildlife Tracking Applications 187 -- 15.3 Modeling Movement Caused by External Forces 191 -- 16 Wireless Sensor Networks: Active Mobility Models 197 -- 16.1 Active Mobility of Sensor Nodes 198 -- 16.2 Active Mobility of Sink Nodes 208 -- Part VI MOBILITY MODELS FOR OPPORTUNISTIC NETWORKS -- 17 Opportunistic Networks 217 -- 17.1 Opportunistic Networks: State of the Art 217 -- 17.2 Opportunistic Networks: User Scenarios 219 -- 17.3 Opportunistic Networks: Perspectives 222 -- 17.4 Further Reading 223 -- 18 Routing in Opportunistic Networks 225 -- 18.1 Mobility-Assisted Routing in Opportunistic Networks 225 -- 18.2 Opportunistic Network Mobility Metrics 231 -- 19 Mobile Social Network Analysis 237 -- 19.1 The Social Network Graph 238 -- 19.2 Centrality and Clustering Metrics 239 -- 19.3 Characterizations of Human Mobility 244 -- 19.4 Further Reading 250 -- 20 Social-Based Mobility Models 251 -- 20.1 The Weighted Random Waypoint Mobility Model 252. 20.2 The Time-Variant Community Mobility Model 254 -- 20.3 The Community-Based Mobility Model 256 -- 20.4 The SWIM Mobility Model 259 -- 20.5 The Self-Similar Least Action Walk Model 264 -- 20.6 The Home-MEG Model 267 -- 20.7 Further Reading 270 -- Part VII CASE STUDIES -- 21 Random Waypoint Model and Wireless Network Simulation 275 -- 21.1 RWP Model and Simulation Accuracy 276 -- 21.2 Removing the Border Effect 278 -- 21.3 Removing Speed Decay 285 -- 21.4 The RWP Model and "Perfect Simulation" 287 -- 22 Mobility Modeling and Opportunistic Network Performance Analysis 293 -- 22.1 Unicast in Opportunistic Networks 293 -- 22.2 Broadcast in Opportunistic Networks 299 -- Appendix A Elements of Probability Theory 309 -- A.1 Basic Notions of Probability Theory 309 -- A.2 Probability Distributions 313 -- A.3 Markov Chains 317 -- Appendix B

Elements of Graph Theory, Asymptotic Notation, and Miscellaneous Notions 323 -- B.1 Asymptotic Notation 323 -- B.2 Elements of Graph Theory 326 -- B.3 Miscellaneous Notions 330 -- References 333 -- Index 335.

Sommario/riassunto

This book highlights the practices for designing effective protocols/applications for next generation wireless networks. In this book, the author provides the reader with an overview of mobility modeling, encompassing both theoretical and practical aspects related to the challenging mobility modeling task. The first part of the book introduces next generation wireless networks, providing motivations for the need of carefully modeling mobility as part of the network performance evaluation process. In addition, it describes “general-purpose” mobility models (i.e., models that are not tailored to specific application scenarios), including both theoretical and practical aspects. Furthermore, the author explores mobility models tailored to specific application scenarios of next generation wireless networks. In particular, the author considers WLAN/mesh networks, vehicular networks, wireless sensor networks, and opportunistic networks. For each considered application scenario, the book briefly presents the state-of-the-art and prospective of the corresponding technology as well as a representative set of mobility models. Finally, the book offers two case studies, which illustrate exemplary situations in which a deep understanding of mobility modeling can be used to devise a “perfect” wireless network simulation methodology (Case study 1), and to characterize fundamental properties of message routing in opportunistic networks, also including social human behavior (Case study 2). Key Features: . Offers an in-depth discussion of the most representative mobility models for major next generation wireless network application scenarios, including WLAN/mesh networks, vehicular networks, wireless sensor networks, and opportunistic networks. Demonstrates the practices for designing effective protocol/applications for next generation wireless networks. Includes case studies showcasing the importance of properly understanding fundamental mobility model properties in wireless network performance evaluation. Mobility Models for Next Generation Wireless Networks will be an invaluable guide for researchers and engineers in the field of wireless networking, and graduate students in computer science and engineering. It will also be of interest to wireless professionals and networking system developers.
