

1. Record Nr.	UNINA9910141291703321
Autore	Taylor Roy <1952->
Titolo	Handbook of retinal screening in diabetes : diagnosis and management // Roy Taylor, Deborah Batey
Pubbl/distr/stampa	Chichester [England], : Wiley-Blackwell, 2012
ISBN	1-119-96855-0 1-280-58742-3 9786613617255 1-119-96857-7 1-119-96854-2
Edizione	[2nd ed.]
Descrizione fisica	1 online resource (x, 173 pages) : illustrations (some color)
Altri autori (Persone)	BateyDeborah
Disciplina	617.7/3
Soggetti	Diabetic retinopathy
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Type 1 diabetes -- Type 2 diabetes -- The eye in diabetes -- The need to screen -- Practical screening -- Normal retinal appearances -- Background retinopathy -- Maculopathy -- Severe non-proliferative ('pre-proliferative') retinopathy -- Proliferative retinopathy -- Advanced diabetic eye disease -- Non-diabetic eye disease -- Background information -- Self-assessment questions -- Answers to self-assessment questions -- Glossary of terms.
Sommario/riassunto	Beginning with chapters summarizing the basics of diabetic retinopathy, this updated volume outlines the need for screening, how to screen safely and correctly, and the normal condition of the retina without diabetic retinopathy, all using excellent line and halftone illustrations. The core focus then moves on to examining each different form of retinopathy, all supported by outstanding color retinal photographs illustrating the appearance of the retina at various stages of retinopathy, plus an analysis on the best treatment for each stage. The book ends with chapters providing self-assessment questions of the type that screeners will encounter when gaining their now mandatory retinal screening qualifications, as well as a background information chapter offering advice on related UK, European, and US

organizations. A website contains all the full-color retinopathy images from the book, with the option to download these into presentations.
