Soggetti	Commerce Business & Economics Vocational Guidance
Lingua di pubblicazione	Tedesco
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Sommario/riassunto	The study examines existing problems in Germany in the area of professional qualification. It shows ways of supplementing and reforming the vocational training system, including by means of a basic vocational qualification that makes the transition sector unnecessary and guides young people into training and employment without waiting around. On the other hand, it is about the construction of a tiered, modularized overall educational system according to EU proposals for making lifelong learning a reality.
