

1. Record Nr.	UNINA990010046050403321
Autore	Solinus, Pier Giorgio
Titolo	Colore di pelle colore di casta : persona rituale società in India / Pier Giorgio Solinas
Pubbl/distr/stampa	Milano ; Udine : Mimesis, 2015
ISBN	978-88-5752-877-9
Descrizione fisica	214 p. : ill ; 22 cm
Collana	Triquetra ; 5
Disciplina	306.0954 305.512
Locazione	BFS FSPBC
Collocazione	306.0954 COLLEZ. 2535 (5)
Lingua di pubblicazione	Italiano
Formato	Materiale a stampa
Livello bibliografico	Monografia

2. Record Nr.	UNINA9910141496103321
Autore	Bloomberg Jason <1961->
Titolo	The agile architecture revolution [[electronic resource]] : how cloud computing, REST-based SOA, and mobile computing are changing enterprise IT / Jason Bloomberg ; with contributions from Ronald Schmelzer
Pubbl/distr/stampa	Hoboken, : Wiley, 2013
ISBN	1-118-55700-X 1-118-42199-X 1-283-99380-5 1-118-41787-9
Edizione	[1st edition]
Descrizione fisica	1 online resource (302 p.)
Collana	Wiley CIO series
Altri autori (Persone)	SchmelzerRon
Disciplina	658.4/038
Soggetti	Business enterprises - Technological innovations Management information systems Service-oriented architecture (Computer science)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Includes index.
Nota di contenuto	Foreword: the agile architecture revolution -- Preface -- Enterprise as complex system -- Introducing agile architecture -- Shhh, don't tell anyone, but let's talk about service-oriented architecture -- Governance : the secret to satisfying the business agility meta-requirement -- The enterprise as complex system -- Conclusion -- List of abbreviations -- About the author -- Index.
Sommario/riassunto	A sneak peek at up-and-coming trends in IT, a multidimensional vision for achieving business agility through agile architectures The Agile Architecture Revolution places IT trends into the context of Enterprise Architecture, reinventing Enterprise Architecture to support continuous business transformation. It focuses on the challenges of large organizations, while placing such organizations into the broader business ecosystem that includes small and midsize organizations as well as startups. Organizes the important trends that are facing technology in businesses and publ

3. Record Nr.	UNINA9910298326103321
Autore	Shivanna K.R
Titolo	Reproductive Ecology of Flowering Plants: A Manual [[electronic resource] /] / by K.R. Shivanna, Rajesh Tandon
Pubbl/distr/stampa	New Delhi : , : Springer India : , : Imprint : Springer, , 2014
ISBN	81-322-2003-X
Edizione	[1st ed. 2014.]
Descrizione fisica	1 online resource (178 p.)
Disciplina	570 580 581.7 631.52
Soggetti	Botany Plant ecology Plant breeding Plant Sciences Plant Ecology Plant Breeding/Biotechnology
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references at the end of each chapters and index.
Nota di contenuto	1. Introduction -- 2. Study Plants and Sites -- 3. Phenology -- 4. Floral Morphology and Sexuality -- 5. Pollen Biology -- 6. Pistil Biology -- 7. Pollination Ecology -- 8. Pollen-Pistil Interaction -- 9. Breeding Systems -- 10. Fruit and Seed Biology -- 11. Seed Dispersal -- 12. Seedling Recruitment -- 13. Appendices.
Sommario/riassunto	Successful reproduction is the basis not only for the stability of the species in their natural habitat but also for productivity of our crop plants. Therefore, knowledge on reproductive ecology of wild and cultivated plants is important for effective management of our dwindling biodiversity and for the sustainability and improvement of the yield in crop species. Conservation and management of our plant diversity is going to be a major challenge in the coming decades, particularly in the tropical countries which are rich in biodiversity. Reproductive failure is the main driver for pushing a large number of

tropical species to vulnerable category. Available data on reproductive ecology on tropical species is very limited and there is an urgent need to initiate research on these lines. A major limitation for the beginners to take up research is the absence of simple concise work manuals that provide step-wise procedures to study all aspects of reproductive ecology. The Manual fills this void. Over 60 protocols described in the Manual cover the whole spectrum of reproductive ecology - study sites and species, phenology, floral morphology and sexuality, pollen and pistil biology, pollination ecology, breeding system, seed biology, seed dispersal and seedling recruitment. Each chapter gives a concise conceptual account of the topic before describing the protocols. The Manual caters to researchers, teachers and students who are interested in any aspect of reproductive ecology of flowering plants -- botanists, ecologists, agri-horticulturists, foresters, entomologists, plant breeders and conservation biologists. .
