1.	Record Nr.	UNINA9910141514903321
	Titolo	Graph partitioning [[electronic resource] /] / edited by Charles-Edmond Bichot, Patrick Siarry
	Pubbl/distr/stampa	London : , : ISTE Hoboken, N.J. : , : Wiley, , 2011
	ISBN	1-118-60118-1 1-299-14634-1 1-118-60119-X 1-118-60125-4
	Descrizione fisica	1 online resource (386 pages)
	Collana	ISTE.
	Altri autori (Persone)	BichotCharles-Edmond SiarryPatrick
	Disciplina	512.7/3
	Soggetti	Partitions (Mathematics) Graph theory
	Lingua di pubblicazione	Inglese
	Formato	Materiale a stampa
	Livello bibliografico	Monografia
	Note generali	Description based upon print version of record.
	Nota di bibliografia	Includes bibliographical references and index.
	Nota di contenuto	pt. 1. Graph partitioning for numerical analysis -- pt. 2. Optimization methods for graph partitioning -- pt. 3. Other approaches to graph partitioning.
	Sommario/riassunto	Graph partitioning is a theoretical subject with applications in many areas, principally: numerical analysis, programs mapping onto parallel architectures, image segmentation, VLSI design. During the last 40 years, the literature has strongly increased and big improvements have been made. This book brings together the knowledge accumulated during many years to extract both theoretical foundations of graph partitioning and its main applications.
