Sommario/riassunto	Expert guidance for building an information communication and technology infrastructure that provides best in business intelligence Enterprise performance management (EPM) technology has been rapidly advancing, especially in the areas of predictive analysis and cloud-based solutions. Business intelligence caught on as a concept in the business world as the business strategy application of data warehousing in the early 2000's. With the recent surge in interest in data analytics and big data, it has seen a renewed level of interest as

the ability of a business to find the valuable data...
