Nota di contenuto	Preface -- Acknowledgments -- Introduction to buy-and-hold -- Stock selection -- Book value -- Capital spending -- Cash flow -- Dividends -- Long term debt -- Price to earnings ratio -- Price to sales ratio -- Return on shareholders' equity -- Shares outstanding -- Fundamental analysis summary -- How to double your money -- Finding 10-baggers -- Trading 10-baggers -- Selling buy-and-hold -- Fundamentals : what I use -- Introduction to position trading -- Getting started in position trading -- Ten factors make chart patterns work -- Three winning trades and a funeral -- What not to do : three botched trades -- What we learned -- Bibliography -- About the author -- Index.
Sommario/riassunto	Comprehensive coverage of the four major trading styles Evolution of a Trader explores the four trading styles that people use when learning to trade or invest in the stock market. Often, beginners enter the stock market by: Buying and holding onto a stock (value investing). That works well until the trend ends or a bear market begins. Then they try Position trading. This is the same as buy-and-hold, except the technique sells positions before a significant trend change occurs.

Swing trading follows when traders increase their frequency of trading, trying to catch the short-term up and down swings
