

1. Record Nr.	UNINA9910141572403321
Titolo	Imbalanced learning : foundations, algorithms, and applications // edited by Haibo He, Yunqian Ma
Pubbl/distr/stampa	Piscataway, NJ : , : IEEE Press Hoboken, New Jersey : , : Wiley, , [2013] [Piscataway, New Jersey] : , : IEEE Xplore, , [2013]
ISBN	1-118-64633-9 1-118-64620-7
Descrizione fisica	1 online resource (224 p.)
Disciplina	006.312
Soggetti	Data mining Information resources management Information resources - Evaluation System analysis - Mathematical models
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.

Sommario/riassunto

Solving imbalanced learning problems is critical in numerous data-intensive networked systems, including surveillance, security, Internet, finance, biomedical, and defense, to name a few. The first comprehensive look at this new branch of machine learning, this volume offers a critical review of the problem of imbalanced learning, covering the state-of-the-art in techniques, principles, and real-world applications. Scientists and engineers will learn how to tackle the problem of learning from imbalanced datasets, and gain insight into current developments in the field as well as future research.--[Source inconnue]
