

1. Record Nr.	UNINA9910141756703321
Titolo	IEC/IEEE guide for the statistical analysis of electrical insulation breakdown data (adoption of IEEE Std 930-2004)
Pubbl/distr/stampa	New York : , : IEEE, , 2007
ISBN	0-7381-5668-X
Edizione	[First edition.]
Descrizione fisica	1 online resource (53 pages)
Disciplina	621.31937
Soggetti	Electric insulators and insulation - Testing - Standards Electric measurements - Standards
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Sommario/riassunto	This guide describes, with examples, statistical methods to analyze times to break down and breakdown voltage data obtained from electrical testing of solid insulating materials, for purposes including characterization of the system, comparison with another insulator system, and prediction of the probability of breakdown at given times or voltages.
