

1. Record Nr.	UNINA9910141778803321
Autore	Gregson Robert A. M.
Titolo	Informative psychometric filters // Robert A. M. Gregson
Pubbl/distr/stampa	Canberra, : ANU Press, 2006 Canberra, Australia : , : ANU E Press, , 2006 ©2006
ISBN	9781920942663 (ebook) 1920942653 (paperback)
Descrizione fisica	1 online resource (322 pages) : illustrations; digital, PDF file(s)
Disciplina	003.857015118
Soggetti	Chaotic behavior in systems - Mathematical models Time-series analysis - Mathematical models
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	Information, Entropy and Transmission -- Transients onto Attractors -- Inter- and Intra-level Dynamics of Models -- A Bivariate Entropic Analogue of the Schwarzian Derivative -- Tribonacci and Long Memory -- Rescorla's Theory of Conditioning -- Nonlinearity, Nonstationarity and Concatenation -- Time Series of Disasters -- Perron-Frobenius at the Edge of Chaos -- ; Appendix: Nonlinear Psychophysical Dynamics.
Sommario/riassunto	This book is a series of case studies with a common theme. Some refer closely to previous work by the author, but contrast with how they have been treated before, and some are new. Comparisons are drawn using various sorts of psychological and psychophysiological data that characteristically are particularly nonlinear, non-stationary, far from equilibrium and even chaotic, exhibiting abrupt transitions that are both reversible and irreversible, and failing to meet metric properties. A core idea is that both the human organism and the data analysis procedures used are filters, that may variously preserve, transform, distort or even destroy information of significance.
