

1. Record Nr.	UNINA9910141816403321
Titolo	Handbook of food fortification and health : from concepts to public health applications. Volume 1 // Victor R. Preedy, Rajaventhana Srirajaskanthan, Vinood B. Patel, editors
Pubbl/distr/stampa	New York, : Humana Press, 2013
ISBN	1-4614-7076-5
Edizione	[1st ed. 2013.]
Descrizione fisica	1 online resource (414 p.)
Collana	Nutrition and health series
Altri autori (Persone)	PreedyVictor R SrirajaskanthanRajaventhana PatelVinood B
Disciplina	363.192 613.2
Soggetti	Enriched foods Food additives - Health aspects
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references and index.
Nota di contenuto	pt. I. Introductory chapters and perspectives of fortification -- pt. II. Iron fortification -- pt. III. Fortified foods and beverages -- pt. IV. Biofortification : biological modes of enhancing nutrient intake.
Sommario/riassunto	Handbook of Food Fortification and Health: From Concepts to Public Health Applications Volume 1 represents a multidisciplinary approach to food fortification. This book aims to disseminate important material pertaining to the fortification of foods from strategic initiatives to public health applications. Optimal nutritional intake is an essential component of health and wellbeing. Unfortunately situations arise on a local or national scale when nutrient supply or intake is deemed to be suboptimal. As a consequence, ill health occurs affecting individual organs or causing premature death. In terms of public health, malnutrition due to micronutrient deficiency can be quite profound imposing economic and social burdens on individuals and whole communities. This comprehensive text examines the broad spectrum of food fortification in all its manifestations. Coverage includes sections on definitions of fortifications, fortified foods, beverages and nutrients, fortifications with micronutrients, biofortification, impact on

individuals, public health concepts and issues, and selective methods and food chemistry. Handbook of Food Fortification and Health: From Concepts to Public Health Applications Volume 1 is an indispensable text designed for nutritionists, dietitians, clinicians and health related professionals.
