

1. Record Nr.	UNINA9910141846903321
Autore	Stoyan Dietrich
Titolo	Stochastic geometry and its applications // edited by Sung Nok Chiu and others
Pubbl/distr/stampa	Chichester : , : Wiley, , 2013
ISBN	9781118658222 1-118-65822-1 1-118-65825-6 1-118-65824-8
Edizione	[Third edition.]
Descrizione fisica	1 online resource (583 pages)
Classificazione	MAT029000
Disciplina	519.2
Soggetti	Stochastic geometry
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Revision of: Stochastic geometry and its applications / Dietrich Stoyan, Wilfrid S. Kendall, Joseph Mecke. 2nd ed. 1995.
Nota di bibliografia	Includes bibliographical references and indexes.
Nota di contenuto	Chapter 1. Mathematical foundations -- Chapter 2. Point processes I — The Poisson point process -- Chapter 3. The Boolean model -- Chapter 4. Point processes II – General theory -- Chapter 5. Point processes III – Models -- Chapter 6. Random closed sets II – The general -- Chapter 7. Random measures -- Chapter 8. AccessLine, fibre and surface processes -- Chapter 9. Random tessellations, geometrical networks and graphs -- Chapter 10. Stereology
Sommario/riassunto	"The previous edition of this book has served as the key reference in its field for over 20 years and is regarded as the best treatment of the subject of stochastic geometry. Extensively updated, this new edition includes new sections on analytical and numerically tractable results and applications of Voronoi tessellations; introduces models such as Laguerre and iterated tessellations; and presents theoretical results. Statistics for planar point processes are introduced, and the text also includes a new section on random geometrical graphs and random networks"--
