Imperial eyes on the Pacific prize : French visions of a perfect penal colony in the South Seas / Jacqueline Dutton.
Sommario/riassunto	It was not until the eighteenth century that France began sending

mariners to the southern oceans on a regular basis, and by that time a new maritime power had begun to emerge: Great Britain. Together, these two nations would play a decisive role in determining the configuration of these little known parts of the globe, and particularly of the Pacific, which had for so long been the almost exclusive preserve of Spain.
