

1. Record Nr.	UNINA9910142215803321
Titolo	1393-1999 IEEE Standard for Spaceborne Fiber-Optic Data Bus
Pubbl/distr/stampa	[Place of publication not identified], : IEEE, 1999
ISBN	0-7381-1550-9
Descrizione fisica	1 online resource (v, 120 pages) : illustrations
Collana	Institute of Electrical and Electronics Engineers
Disciplina	621.3692
Soggetti	Fiber optics - Industrial applications
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Nota di bibliografia	Includes bibliographical references.
Sommario/riassunto	The design requirements for a fiber-optic serial interconnect protocol, topology, and media is established. The application target for this standard is the interconnection of multiple aerospace sensors, processing resources, bulk storage resources, and communications resources onboard aerospace platforms. This standard is for subsystem interconnection, as opposed to intra-backplane connection.
