

1. Record Nr.	UNINA9910142529403321
Titolo	Towards the semantic web [[electronic resource]] : ontology-driven knowledge management / / edited by John Davies, Dieter Fensel, and Frank van Harmelen
Pubbl/distr/stampa	Chichester, England ; ; Hoboken, NJ, : J. Wiley, c2003
ISBN	1-280-27090-X 9786610270903 0-470-29947-9 0-470-85807-9 0-470-85806-0
Descrizione fisica	1 online resource (312 p.)
Altri autori (Persone)	DaviesJ (N. John) FenselDieter Van HarmelenFrank
Disciplina	006.3/3 658.4038
Soggetti	Semantic Web Ontology Knowledge acquisition (Expert systems)
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. [267]-279) and index.
Nota di contenuto	TOWARDS THE SEMANTIC WEB; Contents; Foreword; Biographies; List of Contributors; Acknowledgments; 1 Introduction; 2 OIL and DAML+OIL: Ontology Languages for the Semantic Web; 3 A Methodology for Ontology-based Knowledge Management; 4 Ontology Management: Storing, Aligning and Maintaining Ontologies; 5 Sesame: A Generic Architecture for Storing and Querying RDF and RDF Schema; 6 Generating Ontologies for the Semantic Web: OntoBuilder; 7 OntoEdit: Collaborative Engineering of Ontologies; 8 QuizRDF: Search Technology for the Semantic Web; 9 Spectacle 10 OntoShare: Evolving Ontologies in a Knowledge Sharing System 11 Ontology Middleware and Reasoning; 12 Ontology-based Knowledge Management at Work: The Swiss Life Case Studies; 13 Field

Experimenting with Semantic Web Tools in a Virtual Organization; 14 A Future Perspective: Exploiting Peer-to-Peer and the Semantic Web for Knowledge Management; 15 Conclusions: Ontology-driven Knowledge Management - Towards the Semantic Web?; References; Index

Sommario/riassunto

With the current changes driven by the expansion of the World Wide Web, this book uses a different approach from other books on the market: it applies ontologies to electronically available information to improve the quality of knowledge management in large and distributed organizations. Ontologies are formal theories supporting knowledge sharing and reuse. They can be used to explicitly represent semantics of semi-structured information. These enable sophisticated automatic support for acquiring, maintaining and accessing information. Methodology and tools are developed for intelligent access
