

1. Record Nr.	UNINA9910142641603321
Autore	Richardson Iain E. G
Titolo	Video codec design : developing image and video compression systems
Pubbl/distr/stampa	[Place of publication not identified], : Wiley, 2002
ISBN	0-470-84783-2 9786610555611 1-280-55561-0
Edizione	[1st ed.]
Descrizione fisica	1 online resource (303 pages)
Disciplina	621.388/33
Soggetti	Digital video - Standards Video compression Coding theory Electrical & Computer Engineering Engineering & Applied Sciences Electrical Engineering
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Bibliographic Level Mode of Issuance: Monograph
Sommario/riassunto	Video compression coding is the enabling technology behind a new wave of communication applications. From streaming internet video to broadcast digital television and digital cinema, the video codec is a key building block for a host of new multimedia applications and services. Video Codec Design sets out to de-mystify the subject of video coding and present a practical, design-based approach to this emerging field. Featuring:* Guidance on the practical design and implementation of video coding technology.* Explanation of the major video coding standards, including MPEG-2, MPEG-4, H.263 and H.26L.* Detailed coverage of key video coding techniques and core algorithms.* Examination of critical design issues including transmission, Quality of Service and processing platforms.* A wealth of illustrations and practical examples, including quantitative comparisons of design alternatives.Video Codec Design provides communications engineers, system designers, researchers and technical managers with an essential

handbook to image and video compression technology. The clear presentation and emphasis on real-life examples make this book an excellent teaching tool for computer science and electronic engineering instructors.
