Contraceptive Practices in MoroccoPART 4. ANTHROPOLOGY AND NEW

MEDIA IN THE VIRTUAL MIDDLE EAST AND NORTH AFRICA; 14. "Our

Master's Call": Mass Media and the People in Morocco's 1975 Green

March; 15. The Construction of Virtual Identities: Online Tribalism in

Saudi Arabia and Beyond; 16. Youth, Peace, and New Media in the

Middle East; References; List of Contributors; Index

Sommario/riassunto

This volume combines ethnographic accounts of fieldwork with overviews of recent anthropological literature about the region on topics such as Islam, gender, youth, and new media that are of particular relevance for understanding the "Arab Spring" of 2011. It addresses contemporary debates about modernity, nation building, and the link between the ideology of power and the production of knowledge. Contributors include established and emerging scholars known for the depth and quality of their ethnographic writing and for their interventions in current theory.

Sommario/riassunto

In recent years the management of business processes has emerged as one of the major developments to ease the understanding of, communication about, and evolution of process-oriented information systems in a variety of application domains. Based on explicit representations of business processes, process stakeholders can communicate about process structure, content, and possible improvements. Formal analysis, verification and simulation techniques have the potential to show deficits and to effectively lead to better and more flexible processes. Process mining facilitates the discovery of process specifications from process logs that are readily available in many organizations. This volume of Springer's Lecture Notes in Computer Science contains the papers presented at the 2nd International Conference on Business Process Management (BPM 2004) which took place in Potsdam, Germany, in June 2004. From more than 70 submissions BPM 2004 received, 19 high-quality research papers were selected. BPM 2004 is part of a conference series that provides a forum for researchers and practitioners in all aspects of business process management. In June 2003, the 1st International Conference on Business Process Management took place in Eindhoven, The Netherlands. Its proceedings were published as Volume 2678 of Lecture Notes in Computer Science by Springer-Verlag. A previous volume (LNCS1806) on Business Process Management was based on four events devoted to this topic.
