

1. Record Nr.	UNINA9910143276803321
Autore	Robinson Raoul A. <1928->
Titolo	Return to resistance : breeding crops to reduce pesticide dependence / / Raoul A. Robinson
Pubbl/distr/stampa	Davis, CA, : AgAccess, 1996
ISBN	1-280-84972-X 9786610849727 1-55250-363-1
Descrizione fisica	1 online resource (xv, 480 pages)
Disciplina	581.1 632/.96
Soggetti	Plant breeding Crops - Genetics Plants - Disease and pest resistance - Genetic aspects
Lingua di pubblicazione	Inglese
Formato	Materiale a stampa
Livello bibliografico	Monografia
Note generali	Description based upon print version of record.
Nota di bibliografia	Includes bibliographical references (p. 458) and index.
Nota di contenuto	Contents; Acknowledgments; Introduction; Part One: Explanations; Part Two: Examples; Part Three: Solutions; Glossary; Appendices; Index
Sommario/riassunto	In the tradition of Silent Spring, Raoul Robinson's Return to Resistance calls for a revolution. Traditional plant breeding techniques have led us to depend more and more on chemical pesticides to protect ourcrops. Return to Resistance shows gardeners, farmers, and plant breeders how to use a long-neglected technique to create hardy new plant varieties that are naturally resistant to pests and disease. Horizontal resistance breeding has been largely ignored in this century due to the popularity and apparent successes of the Mendelian geneticists.
