Sommario/riassunto	Diabetes presents differently in older people and normal ageing processes, predisposition to specific complications, and other co-morbid conditions complicate its management. The underlying philosophy of this book is that there are opportunities for prevention, health maintenance and rehabilitation for older people with diabetes, which can realistically improve their quality of life. This book is an easy to follow essential guide to providing skilled and effective care for older people with diabetes in community, acute and residential care settings.

It aims to provide nurses and other h
